Sueanne Demers
Shelby Township, Michigan

I cannot attend today's session but wanted my voice heard. I absolutely DO NOT want a smart meter by any utility/city on my home for all of the reasons discussed today. I PURPOSELY live my life in a certain way. I do not microwave, I feed my family organically(everything from USA or Canada) ALL THE TIME!!!! I do not use a cell phone or live close to a cell tower or power lines. I use a landline, I got rid of wifi and hardwired my computer(that I rarely use because it gives me headaches) I read labels. We do not own a flat screen TV, Ipad or use a fitbit wrist device. These are choices made to maintain a healthy environment(reduce radiation) for myself, spouse, pets and children. These are deliberate and WELL RESEARCHED choices that I go out of my way to do. I will not allow a smart meter device in any way shape or form onto my home that takes away my CHOICE, our health, our freedom. Heaven forbid it would be inconvenient for the powers-that-be to monitor me, my electrical usage and sabotage my health. I will also not allow a "safety" device to be put on my vehicles(which will also emit radiation) that are now being tested in Ann Arbor with designs to be put on EVERY vehicle all in the name of "safety" in the next few years. HOW DARE ANYONE demand that a device be mandatory. Utilities are in charge of a necessary commodity that everyone needs and they have a responsibility to deliver that in a safe environment. Period. The electrical grid needs to be updated and can be done without a smart meter device.

I am a homeowner, a productive citizen, educated, degreed and informed. This will not be tolerated. If these smart meters are so safe why the sneaky installation tactics? Why are there 33 pages (20 videos on each page) from people all over the world protesting this technology on You Tube? They are not doing it out of boredom. Be open to the information you are being provided with. Wifi is even being pulled out of schools all across the world/country because of the damage to health.

THIS IS A BIG DEAL!!!! Smart meter and wireless electrosmog is tomorrow what asbestos is today.
